Vladimir Jeremic

Tech Visionary & Creative Innovator

I am an accomplished multimedia designer and developer with extensive expertise in graphic design, web design and development, and project management.

My career spans diverse industries and projects, from small startups to large enterprises.

I am passionate about creative problem-solving, digital innovation, and crafting engaging user experiences.

With over 25 years of experience in design, software engineering, iGaming, blockchain development, and game design, I specialize in delivering secure, scalable, and user-centric software solutions.

I thrive in leading cross-functional teams, managing complex projects, and integrating cutting-edge technologies such as Web3, NFTs, DeFi protocols, and decentralized systems to achieve impactful outcomes.

My expertise in graphic and web design, combined with deep IT industry knowledge, market trend awareness, and a commitment to continuous learning, enables me to create immersive, visually stunning, and compliant gaming experiences.

I am equipped to lead both in-house and outsourced teams to deliver secure, engaging, and compliant gaming solutions that enhance market share and ensure sustained growth.

2022 – 2024

SmartBits BV | CTO, Online Casino www.888bits.com Vienna, Austria, Curacao, Cyprus

As CTO, spearheaded the technical strategy and operations of an online crypto casino, leveraging blockchain and cryptocurrency technologies to deliver secure, scalable, and innovative gaming experiences.
.Developed and executed a technical roadmap integrating Ethereum and Solana for transactions, smart contracts for provably fair gaming, and decentralized systems for transparency.
.Led implementation of cryptocurrency payment systems (Bitcoin, Ethereum, USDT), achieving low-fee, fast transactions and global accessibility.
.Enhanced platform security with secure crypto wallets and robust cybersecurity measures, protecting user funds and data while supporting high transaction volumes.
.Directed a team of 15+ developers, smart contract engineers, and IT staff, fostering collaboration to deliver innovative features and 99.9% platform uptime.
.Collaborated with game providers (Vivo Gaming, Betsoft, Spinomenal, Nucleus) to integrate blockchain-optimized casino games, ensuring seamless performance and stunning graphics.
.Ensured compliance with global gambling and crypto regulations, implementing anti-money laundering protocols and user protection measures.
.Designed scalable infrastructure using our own network structure, decentralized storage, and APIs, optimizing for cross-platform (desktop/mobile) user experiences with a focus on anonymity.
.Partnered with CEO and marketing teams to align technical initiatives with business goals, attracting privacy-focused players and boosting user acquisition.

2017 – 2022

Overgame2009 | Project Manager, Lead Games Designer, Vienna, Austria

Led the creative and technical development of casino games, delivering engaging, fair, and profitable experiences for online and mobile platforms.
.Designed innovative game bonuses, mechanics, and features for slots, table games, and live dealer games, aligning with market trends and increasing player retention.
.Managed a team of 10+ designers, artists, developers, and mathematicians, providing creative direction and ensuring cohesive game development.
.Utilized Adobe Animate, and Construct 3 to prototype game mechanics, animations, and RNG systems, iterating based on play testing and player feedback.
.Collaborated with mathematicians to develop provably fair payout structures and RNG systems, ensuring regulatory compliance and profitability.
.Oversaw integration of blockchain technologies for transparent game outcomes, enhancing trust in crypto-based platforms.
.Worked with marketing and casino operators to align games with business objectives, contributing to a increase in user engagement.
.Stayed updated on gaming tech (e.g., Web3, VR), incorporating cutting-edge features to maintain competitive edge.
